

CHANGE IN FILE STATUS
APPROVAL FORM

DATE January 16, 1987

CURRENT FILE NO. ACT/037/031

RECOMMENDED FILE NO. DOE/037/031

COMPANY AND MINE NAME Clyde Sanchez, Dusty #4

REASON FOR CHANGE IN FILE STATUS

The Division received a MR-1 on November 9, 1977 for this underground uranium mine that Clyde Sanchez worked intermittently. The MR-1 stated that the mine had been worked since the mid 50's and that the mine site covered one acre. A December, 1977 Division inspection verified that the mine had a one acre pad area and one acre of access road. Mr. Sanchez cooperated with the Division's requests for additional information and, eventually, the Division issued Tentative Approval for the operation and requested a reclamation bond of \$2700 on April 3, 1979. Mr. Sanchez immediately sent in a DOE application which was conditionally approved on May 15, 1979.
